

ERGYS²
YOU ARE THE MOVING PART

We like to think that the ERGYS is one of the all-time great marriages of man and machine. Take an incredibly clever engineering design and combine it with a motivated rider and you get one intense workout. And with five computers operating in perfect harmony, there's only one thing missing:

THE POWER OF YOUR MUSCLES

The ERGYS for home and clinical use is a prescribed device for C- and T-level SCI and other neurological conditions.
